INDIAN MARITIME UNIVERSITY
(Central University, Govt. of India)

No.IMU/Wireless Network/2016

Dated 14th June 2016

CIRCULAR

Sub: IMU – Establishment of Wireless Network in IMU Campuses – reg.

Access to the Internet is critical for the Students, Faculty, Officers and Staff of the University, for making use of the current and fast expanding resources on the web and to keep themselves informed of the new developments in their areas of interest. Important documents of the University, required for frequent reference, are available on the University Website. Indian Maritime University has also taken action for enhancing the subscription to the Online Journals and Magazines for the benefit of the students and Faculty.

In order to access the required resources on the web, good connectivity is necessary for everyone. The office rooms of the University have wired LAN connectivity for accessing the web. But, the present level of connectivity is not satisfactory in the Class Rooms, Library, Conference Rooms and Hostels. Good connectivity at Hostels is very important for the benefit of the students.

The wireless network makes it convenient to access the web using varied devices such as Laptops, Tablets and Mobile Phones, which are primarily the devices used by the students. Keeping the above requirements, during the meeting of Campus Directors held on 10th May 2016, the Vice Chancellor had directed that all the Campuses have to be provided with

Wi-Fi facilities at various locations, primarily for the benefit of the students. It should cover all the Hostel Rooms, Class Rooms, Library, Conference Rooms and other important locations, except Playgrounds, Open Lawn, etc.

The Campus Directors have to identify all the locations in their Campus which are to be covered using Wi-Fi Access Points. Fibre connectivity may be required in some cases for extending the existing to LAN to the Hostel Buildings. Necessary active and passive components are to be procured, as per the requirement, for establishing the Wireless Network. The Campus Directors may take the assistance of Service Providers such as BSNL for planning and establishing the Wireless Network in the Campus.

All the Campus Directors are requested to take all necessary action to plan and establish a secured Wireless Network in their Campus by 31st July 2016. The expenses involved for establishing this network will be reimbursed by IMU HQ if the work is completed by 31st July 2016.

This Circular issues with the approval of the Vice Chancellor.

For REGISTRAR

To: All Campus Directors, IMU
