Vice Chancellor

India is endowed with 12 Major and 200+ Non-Major Ports situated along its 7500 km long coastline and a vast network of navigable waterways. The maritime sector plays a crucial role in the overall trade and growth, with 95% of the country's trade volume and 65% of the trade value being undertaken through sea transport. During the year 2020 the NITI Aayog of India unveiled "Blue Economy" initiatives to harness the full potential of Maritime / Ocean resources.

Blue Economy offers a high potential for next phase of growth, resources and job creation but with commensurate challenges. The Blue Economy policy advances a framework for participation of private sector and coastal communities, enhancing the application of science-based tools to ocean management, sustainable uses of oceans & coastal areas, and setting priorities.

Indian maritime sector plays a crucial role in the country's socio- economic growth. Globally, India ranks 2nd in ship recycling, 21st in Ship Building and 5th in supplying trained manpower to this sector. Maritime India Vision 2030 (MIV 2030), a blueprint for the coordinated and accelerated growth of Indian maritime sector, has been formulated by the Ministry of Port, Shipping and Waterways, Government of India with an objective of propelling India to the forefront of global maritime sector in the next decade. MIV 2030 outlines ten key themes, ranging from development of world class port infrastructure with well-coordinated multimodal transport chain to enhancement of maritime education, research and training, which are essential for overhauling Indian maritime sector and place India in a global maritime leadership position.

These new prospects open up opportunities for young minds of India - like never before in the recent past - in myriad sub-domains of maritime sector. Be it a captain, engineer, ship builder, designer, port manager, logistics expert - an ocean of opportunity is beckoning the students who are capable and interested.

If hard work and adventure doesn't scare you, you are the right candidate to join us. IMU transforms raw energy and minds of young students into professionals fit for challenges posed by the oceans. IMU offers under- graduate, post-graduate and doctoral studies in maritime fields through its four schools spread over six IMU Campuses and its Affiliated Institutes across India. The Programmes offered are unique and tailor made to suit the industry needs. This fact is corroborated by a placement record which is among the best in the country.

Come and be a part of IMU.
